Thinking Inside The Box

The AirSpace® Pillow packaging system provides a source for “on-demand” production of void-fill and light cushioning materials as a replacement for Kraft paper, loose-fill, foam-in-place and large bubble packaging applications. These durable, lightweight pillows are re-usable, aesthetically pleasing, economical and offer a clear view of your product.

AirSpace® is a compact packaging solution that’s easy to use, flexible and cost-effective. Now that’s thinking inside the box!

Innovative AirSpace® Pillows

Using durable polyethylene film, the AirSpace® system produces clean, clear, reusable, lightweight air “pillows” to fill any void or provide light cushioning economically and efficiently.

Features	Benefits
“On-demand” supply	Saves space and handling
Clean and neat	Improved customer satisfaction, less clean-up
See through	Improved visibility minimizes “lost” products
Light weight	Lower shipping costs
Re-usable & recyclable	Environmentally friendly and saves time and money on material replacement
Durable	Excellent void-fill and light cushioning properties
Adjustable pillow length	Increased package flexibility

Revolutionary AirSpace® Machine

The compact, easy-to-use AirSpace® machine produces interior pillow packaging materials for dunnage and light cushioning applications. The compact machine is a self-contained, “plug ‘n’ play” package system that weighs less than 100 lbs., uses standard 115 volt power and only requires a 20” x 40” foot print. Adjustable pillow sizes and batch volumes save time and eliminate unnecessary steps.

Features	Benefits
Internal air supply	Portability and no compressor needed
Batch processing with full cut	Lower labor cost and decreased repetitive motion
40+ pillows per minute (>2 ft ³ /minute)	Able to keep up with volume requirements
Adjustable pillow length	Increased package flexibility
Quiet operation	Improved work environment
Bright color	Visibility for safe, accident-free use
End of roll warning	Reduces down time
Automatic shut off	Minimizes jamming and reduces down time

Engineered For Real World Applications

1. Void-fill – The system’s primary application is as an innovative and ideal alternative to traditional void-fill such as Kraft paper, loose-fill, foam-in-place and bubble wrap.
2. Light Cushioning – AirSpace® pillows provide light-duty cushioning for many breakable products.
3. Bracing – AirSpace® can also be used for bracing certain less-fragile items from movement inside the box.
4. Space Filling – Similar to void-fill, space-filling applications include maintaining size and shape properties of articles - such as purses or shoes - both prior to retail sale or while on the shelf.

AirSpace® Superiority

Product	Void-fill	Cushioning (light)	Recycle or re-use	Storage	Shipping & Handling	Packaging Aesthetics
Air Pillow	•	•	•	•	•	•
Loose Fill	•	•				
Biodegradable Loose Fill	•		•			
Kraft Paper		•	•	•	•	
Bubble Wrap	•	•	•			•

Why AirSpace®?

No other packaging solution offers as compact, portable and efficient a void-fill and light cushioning material at such an affordable price. And it’s so easy to use, just plug it in and start saving time and money immediately.

No more mess. No more “lost” product. No more unsatisfied customers. Just clean, clear, durable, re-usable materials produced on-demand for superior packaging results.

Specifications

Size:	19" W x 36" L x 12" H	Weight:	90 lbs.
Power:	110 Volt, 10 Amperes	Air Supply:	Internal
Max. Pillow:	10" x 6"	Min. Pillow:	10" x 3"
Pillows/Minute:	440+ (any size)	Ft.³ / hour (max.):	135

Accessories and Options

Pillow Hopper. A pillow reservoir that's designed to attach onto the pillow cart to gather pillows as they're being produced. When full, it is removed, hung over the actual packaging station and the bottom is opened for easy access to the pillows.

Portable Pillow Bin. Similar to a laundry cart, the portable pillow bin is used as a container for pillows to be easily transported to workstations.

Motorized Stand. Aids in raising and lowering machine for added efficiency and improved ergonomics.

Polyair Packaging

Since 1988, Polyair Packaging has been dedicated to providing innovative protective packaging solutions to its valued North American customer base. A division of Polyair Inter Pack Inc.,* Polyair Packaging offers a wide range of economical, leading edge products specifically designed to meet customer requirements and challenges. Polyair's team of dedicated, progressive personnel ensures customers of the utmost in quality products and customer service.

*Polyair Inter Pack is a public company whose shares are traded on the Toronto Stock Exchange under the symbol "PPK".
